

Pumping station Aquapump F XL Duo, SPF 3000-S1, D0

Article information

Item no.: 8742022 GTIN: 4026092069585 Price group: 60

Advantages

- Maximum safety
- Flexible installation
- Hygienic advantages for maintenance and repair

Description

The pumping station for faecal and faecal-free wastewater is equipped with a submersible pump, a backflow preventer and a shut-off valve for the pressure pipe. The collection tank made of permanently resistant polymer (PE) has a closed pump tank (dry installation) with a screwed-on access cover.

The station is controlled by a user-friendly control unit, which is optionally integrated in the building management system via a potential-free contact. Alternatively, alarm and collective fault messages can be output via a GSM interface.

The KESSEL modular system provides different upper sections and engineering
chamber options as accessories.Type of wastewater:wastewater with sewage
underground installation, floor slab installation

Version:

Type of system: Installation: Shut-off valve: Pump control: Backflow preventer: Access steps: Twin pump station Dry installation Shut-off valve made of polymer Control unit integrated yes

Note on installation depth:

Delivery state:

Version with lowest installation height

Pre-mounted for final assembly on site (pumps and sensor system must be fitted on site and control unit must be connected)

General characteristics:

Colour:	black
Standard:	EN 12050-1

Dimensions:

Length:	1,295 mm
Width:	1,295 mm
Height:	1,500 mm
